Description

The Wishlist created manually in the section "My Wishlists" can't be modified any way (updated, delete, add items etc.).

Steps to reproduce:

1. Open site: <http://prestashop.qatestlab.com.ua/en/>
2. Click My Account, choose section My Wishlists
3. Create new wishlist, enter it's name (for example, "tata") and press "Save" button
4. Go to the main page, Section Women
5. Add some items to Wishlist
6. return to My Account, section My Wishlists

Expected result:

After creation of a new wishlist "tata" we can manage it any way (add new items to it, modify, delete etc.) -

Actual result:

After creation of a new wishlist "tata" we can't add items to it, because all items are adding automatically in a built-in wishlist named "Мой лист пожеланий" without providing an alternative choice.

Also we can't delete it from the list of wishlists.
